Cloud Infrastructure Specialist with a technical background in software development, focused on automating and optimizing the management of Microsoft Azure environments. My approach combines engineering logic and architecture to deploy resilient, secure, and financially efficient solutions. I excel at transforming business needs into solid technical implementations, prioritizing operational excellence and continuous process improvement.

Experience

Azure Cloud Engineer | ReadyMind

May 2025 - Present

- **Automation:** Designed and developed internal tooling (Astro/Functions) for identity management and mass resource auditing utilizing KQL queries.
- **Infrastructure Migration:** Executed resource movements across subscriptions and resource groups under Lift & Shift methodology, leveraging IaC for environment recreation and dependency mapping.
- **Cost Analysis & Assessments:** Conducted Azure Migrate projects to project on-premise to cloud migration costs, comparing PAYG vs. Reserved Instances (1y/3y) investment scenarios.
- **Auditing & Best Practices:** Performed tenant diagnostics to recommend optimizations across FinOps (Right-sizing, orphaned resources), Governance (RBAC, tagging policies), and Security (Zero Trust).
- **Consulting & Technical Support:** Led technical sessions with clients for results presentations, troubleshooting, and guidance for remote deployments in production environments.

Education

Bachelor of Science in Computer Engineering | UADE

March 2026 - Present (In Progress)

Associate Degree in Software Development | Instituto de Formación Técnica Superior N°11

August 2023 - November 2025 (Graduated)

Certifications

- AZ-104 (Azure Administrator Associate) | AZ-700 (Azure Network Engineer Associate)
- AZ-900 (Azure Fundamentals) | DP-900 (Azure Data Fundamentals)
